Cost effective colour for lasting impact

Communicate in colour for added impact with the incredibly efficient iRC2380i, iRC3080/i and iRC3580/i. These compact multifunctional printers act as the central hub for your document communication, enabling you to capture, manage and distribute information at speed and with professional document output.

Whenever you choose a print device to help improve efficiency around the office, it's important you choose a device that's equipped to do the job, won't consume your budget and won't take up too much valuable office space. Canon's iRC2380i, iRC3080/i and iRC3580/i are the intelligent, highly affordable solution, putting productive colour communication at everyone's fingertips in one highly compact multifunctional device.

With Canon technology your colour prints are always affordable. And importantly when you don't need colour, you don't pay for it. That's because our Auto Colour Sensing System automatically detects which documents contain colour, and which don't, and then prints accordingly, helping to fix the price per page and keep costs down.

The compact iRC2380i, iRC3080/i and iRC3580/i can be housed anywhere – connecting wirelessly to your network (LAN) and ready to go in minutes. Managing the device is equally simple using Canon's web-based iW Management Console (iWMC). Numerous devices can be centrally managed with features such as central control of remote devices, new device discovery, and device error notifications (i.e. out of toner) via automated email.

A number of powerful tools exist which allow you to keep a tight reign on your costs. Canon's optional iWAM MEAP software is a management tool that allows you to easily determine who is printing what, where and how much it's costing you.

The new AMS feature included within Canon's uniFLOW Output Manager allows you to set specific profiles for individuals or departments. For example, certain departments or individuals can be restricted to only black and white prints, whilst others can print in full colour. This helps you to manage resources in line with business needs and keep costs to a minimum.

Canon's unique e-Maintenance automatically reports any problems to service centres and Canon partners, so you don't need to worry about constant monitoring.

The iRC2380i, iRC3080i and iRC3580i are network-ready.

The optional EFI Controller for the iRC3080 and iRC3580 'non-i' models, enhances printing performance and offers True Adobe Postscript.

Use the multifunctional iRC2380i, iRC3080/i and iRC3580/i to create a highly efficient flow of succinct, informative and impactful communication throughout your business. This wireless network device occupies little room but delivers big results – with colour print, copy, fax, scan and send facilities managed in one powerful system.

Quality and performance within your budget

The iRC2380i, iRC3080/i and iRC3580/i deliver impressive performance for such compact, affordable devices. Count on high quality prints at up to 35ppm in black and white or 30ppm in colour (iRC3580/i only).

Bring new levels of professionalism to your document communication. Canon's high quality toner ensures a uniform distribution of colour onto every page, with a professional matt finish. A varied range of accessories allows you to create all manner of output including booklets, stapled reports and hole-punched documents, ultimately saving you time and money.

Open up a new world of communication possibilities with the iRC2380i, iRC3080/i and iRC3580/i. Scan documents via the document feeder and then instantly send there where you need them – to network folders, email addresses and mailboxes. Mailboxes act as secure storage at the device for all documents, and can be established for individuals and groups of users. Any document can be scanned, sent to, or printed directly from a mailbox at your convenience – handy if you don't want a confidential report lying around before you have a chance to retrieve it. Plus, you can also preview documents in your mailbox at the device before printing.

The iRC2380i, iRC3080/i and iRC3580/i provide device access control by passwords, company log-in procedures or even fingerprints if you use Canon's uniFLOW Output Manager option. Documents can be held in secure mailboxes until the relevant user is ready to print for watertight security. Scanned documents can also be encrypted before sending to others or a secure watermark can be embedded into a printed document, becoming prominent when someone attempts to make a copy. Network authentication tools ensure that only authorised PCs can communicate with the iRC2380i, iRC3080/i and iRC3580/i. Plus, device hard disks can be erased or encrypted, and "job logs" concealed.

360

Using Canon's innovative iW360 software, any document based workflow or process is easier to achieve. From manuals to sales tools, proposals to reports, iW360 enables you to produce professional documents and manage a multitude of data in minutes, automating time consuming manual tasks.

The iRC2380i, iRC3080/i and iRC3580/i (along with the HDD Data Encryption Kit) also qualify for EAL3 status under the Common Criteria Program (ISO15408): the global standard for IT security evaluations.

Next-generation features for professional-standard results

The range of finishing options on the iRC2380i, iRC3080/i and iRC3580/i mean you can produce professional documents quickly and easily without the hassle and expense of outsourcing.

Making your documents look like the real deal is easy with the iRC2380i, iRC3080/i and iRC3580/i.

1 With no more than a few simple mouse clicks, and the Saddle Finisher Y2, you can produce automatically folded booklets - even up to A4 in size. Buffer Pass Unit E2 is required.

2 Increase productivity by adding hole punch capability to the functionality of the finisher.

3 For extra copies or heavier workloads, the Finisher Y1 is ideal with its two trays and a 2,000 sheet capacity. It also accommodates 50 sheet stapling for sturdier report production. Buffer Pass Unit E2 is required.

*Optional

4 A 50 sheet document feeder (DADF) helps cope with scanning and sizeable copy runs, accommodating documents with different sized pages.

5 Transform a simple colour report into a fully stapled document with the optional internal Finisher Z1. Staple capacity is 50 sheets of A4, with a capacity of 500 A4 - A5R in a single print run.

6 Using the Multifunctional Embedded Application Platform (MEAP), Canon's Java based application platform, enables new and customised software to be incorporated directly within your device. This way you can future proof your investment. Plus, the device also adheres to the strictest environmental standards such as RoHS, which restricts the use of hazardous substances.

7 Two cassettes are equipped as standard. Each of the 550 sheet cassettes are user-adjustable to cope with paper sizes between A5-A3+.

8 A total of 4,950 sheets gives huge versatility from 6 different sources, including optional additional trays, allowing you to produce stunning colour documents combining different media types and weights.

9 The 50 sheet stack bypass accommodates a variety of media up to 220gsm.

10 Configure the iRC2380i, iRC3080/i and iRC3580/i with the 2,700 sheet paper deck and you have a comprehensive paper supply equipped for the most demanding workloads.
